## Training exercise with loud noises set for McNary Dam

**UMATILLA, Ore.** – A training exercise with loud noises has been scheduled for McNary Lock and Dam here for Wednesday, February 7, from 9 a.m. to 11 a.m., according to officials of the U.S. Army Corps of Engineers, Walla Walla District.

Oregon State Police Arson and Explosives Section technicians from Pendleton, Ore., will be providing situational-awareness training to McNary employees.

Although the fireworks-like noises can be very loud, they are part of an OSP-controlled demonstration to supplement the instructional class, and the sound will pose no danger to members of the public or property.

For more information, contact the Walla Walla District public affairs office at 509 527-7020.
